The industry places a big focus on re-use of assets on the journey to net zero carbon.

While this is a huge benefit in achieving sustainability goals, asset enhancement also holds huge potential to transform lives and revitalise our cities, particularly driven by re-use of retail space. Director of Architecture Kieran Bradley examines the opportunities and challenges, and how the overall approach must be embedded in the local bigger picture.

Localised attitude to retail asset enhancement will revitalise U... • 7 pages

5 insights driving retail asset enhancement across the UK.

The future of workplace: Building for businesses and people

Last week, our director of architecture George Brennan hosted a panel talk at UKREiif on this very topic, bringing together clients, developers and investors to discuss 'The Evolution of Work'.
